RE: Warman VS Melissa Guille and The Canadian Heritage Alliance

Dear sirs, I'd like to make the following submission into the record as an interested party in these proceedings. Having been apprised of the complaint, I'd like to suggest the following disposition to this case:

- 1) I think Ms. Guille should be persuaded to disallow any postings on the board of her website should she deem them inappropriate in style or content resulting from this.
- 2) The most severe sanctions that should flow from this hearing would be a very specific order, to desist from allowing postings that lack adequate regard for the rules of intelligent expression.
- 3) No one should ever threaten a well meaning soul like Melissa with the harsh penalties that seem to loom over other cases in this field of interest. It would be cruel and inane to have this gal labour under such apprehensions a moment longer. Discussion is always the answer to resolution when dealing with reasonable folk. And I can certainly say that Melissa is altogether exactly such a person!
- 4) The Human Rights Board will never have any credibility as long as it seeks to stifle intelligent discussion regarding the conduct and desirability of whatever groups exist in our space here. To go so far as to reject truth as "no defence" is a rather inane and yes indeed an evil disposition to have perpetrated on a civilized being. As such I think you will certainly be out of this business in due course. I am working to see that this does in fact occur in this country as the agenda that appears quite clearly here is one that smacks of self interest with regard to protecting those guilty of whatever would hold them in disregard, contempt or suspicion by right minded folk who are entitled to be vigilant and to seek changes for the improvement of our conduct as a society on the whole. As long as you hold otherwise, you are in an incompetent position to sit in judgement of what Melissa should be allowed to express with respect to ideas. You have to be willing to allow rightness or accept that there is no legitimacy to your approach. I do not say this lightly, I think it is just that simple. 5) Warman does not strike me personally as the type that is above victimizing women as Melissa is being done to here. To make a living from seeking to gain press for no other reason than semantic objections to legitimate expression based on nothing more than political correctness is a disposition that I believe should be discouraged. I say give this man no more press in

this area. He has no further business here. All activities in this area should be well meaning, intelligent and Christianly defensible. Anything else should be discouraged and sanctioned appropriately with an order to cease and desist. Additional penalties can only be considered in good conscience if these conditions have all been

rejected outright and there is therefore a lack of a suitable alternative for resolution in the interests of true justice.

Signed, Michael Chessman

CC Ms. Melissa Guille & Press Release

Following this appeal, and when the decision in her matters was announced we received a copy of the judgment from Paul Fromm who was in Ottawa with Melissa Guille, and further to that a nice note from Melissa Guille personally thanking us for intervening on her behalf and for the great sense of "fairness" we showed in what it is we said in regards to The Tribunal regarding the affair. (We had been happy to send in a hundred dollars that week as "lunch money" for Melissa through Paul - god bless!
